

Features

- Survey any facility quickly and easily
- Completely portable
- Demonstrate the coverage of repeaters
- Batteries operate system up to 6 hours
- -3dB reduced sensitivity for built in buffer during survey

Description

The NC575 is a portable, easy-to-use Site Survey Unit that takes the guesswork out of creating a wireless installation plan. This quick and accurate survey is used to determine optimal locations for repeaters in a Tek-CARE®570 Wireless Nurse Call System. The Unit is powered by three AA batteries (not included).

Specifications

Instructions: See: IL1089 Tek-CARE®570 installation manual.

Survey Transmitter: If mobile transmitters are included in the system, use those devices to determine coverage.

Receiver: Processes radio signals from transmitters and displays status.

NC575 Site Survey Unit

TekTone® has designed Tek-CARE570® to work as a system. Its Tek-CARE® Appliance Server has been carefully designed and matched to work with Tek-CARE570 wireless and wired peripherals. TekTone will not warrant or support components of Tek-CARE570 that are purchased separately unless the components are add-ons to previously sold systems. TekTone will also not warrant or support a system that is a mix of TekTone and non-TekTone parts, unless prior permission has been obtained. A site survey must be performed and submitted before ordering a Tek-CARE570 system. In order to track our systems and to inform facilities of software upgrades, full site information (site name, address and phone number) will be required when ordering. Site information and Tek-CARE Appliance Server warranty numbers will also be required when requesting technical support.
