TekTone®

COMMUNICATIONS FOR TODAY … AND TOMORROW.

Tek-CARE® 400 P5+

nurse call system

MOBILITY

Calls can be received and answered from any mobile device on the network to ensure staff will always know when and where help is needed, even when juggling multiple tasks.

EASE-OF-USE

The Tek-CARE platform is simple to use, with touch-screen options and a user-friendly interface. On-duty staff will find interacting with the system a breeze.

COMMUNICATION

The Tek-CARE400 P5+ is designed to keep communication rolling. Full duplex audio, voice-enabled apps and staff messaging can make sure that everyone is on the same page.

Tek-CARE® 400 P5+
nurse call system

The Tek-CARE400 P5+ is designed to meet the needs of a growing market, providing:

- Customizable options
- Expandable infrastructure
- User-friendly system interaction
- Increased efficiency
- Patient satisfaction

2000
15 million

The number of people using long-term care facilities is projected to increase from **15 MILLION** in 2000 to **27 MILLION** in 2050. With a surge in aging population on the horizon, health care facilities need to account for an increasing number of residents that require constant care.
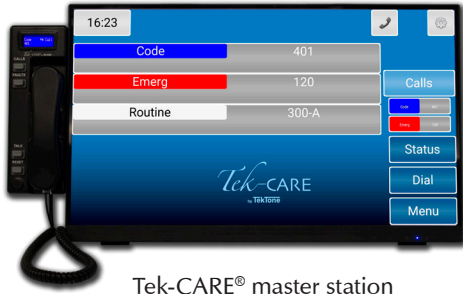

2050
27 million

The Tek-CARE400 P5+ offers two versatile, touchscreen master station options, allowing you to decide which option best fits your needs and your budget. Whether sleek and compact, or large with multiple call viewing options, the Tek-CARE400 P5+ provides master station options for your needs. Both masters utilize a handset option for two-way audio communication, and provide touchscreen capabilities.

CUSTOMIZATION → **EFFICIENCY** → **PATIENT SATISFACTION**

Addressable stations allow residents to open a voice channel between their room and the nurses station, allowing staff to accurately assess the time needed to respond. Using the Tek-CARE Staff App integration, calls can also be answered via a networked mobile device during times when a staff member may be responding to another call, making rounds or occupied with another task. Stations provide a modern aesthetic, and utilize customizable buttons on both patient and peripheral stations. The addressable stations and peripherals are all completely supervised, adding reassurance for maintenance and administration staff alike.

SYSTEM FEATURES

- Touchscreen masters stations
- Map view for identifying call locations
- Budget-friendly master station options
- Customizable station buttons
- Check-in station
- Tek-CARE Staff App with audio
- Reporting
- Backwards compatibility
- Full-duplex audio

Hospitals

Surgery Centers

Free Standing ERs
